Summary

Prof. dr. Bas Arts (1961) holds a personal chair in forest governance at the Forest and Nature Conservation Policy (FNP) group at Wageningen University, the Netherlands. He is also chief scientist at PBL Netherlands Environmental Assessment Agency. Arts holds a Master in biology (Majors in forest ecology and in environmental sciences, 1987) and a PhD in public administration and environmental sciences (1998). Currently, Arts' research and teaching focus on international forest, biodiversity and climate change governance, on local natural resource management and on their interconnections (global-local nexus, multi-level governance). His experience includes research in the Netherlands, Europe and the Tropics, interdisciplinary work with natural and social scientists, policy design and scenario development with stakeholders, and policy advice at various levels (United Nations, EU and Netherlands). Arts was Visiting Professor at the Europe College in Bruges, Belgium (2006-2010), at BOKU University of Life Sciences in Vienna, Austria (March-April 2010), at the Geography Department of Cambridge University, UK (October 2013), at the School of Natural Resources and the Environment of the University of Michigan, USA (March-April 2014) and at the Department of Land, Environment, Agriculture and Forestry of the University of Padua (October 2022). Also, he was Visiting Fellow at the Max Planck Institute on Common Goods in Bonn, Germany, for half a year (2002). He (co)produced over 160 academic publications, including journal articles, books, book chapters and reports, which are overall well-cited (H-indices: 57 and 37 from Google Scholar and Scopus, respectively). Over the years, Arts acquired – both as main applicant and co-applicant – over 25 research grants, including NWO, EU Framework and EU Horizon 2020 programs. Since 2006, 44 PhDs graduated under his (co)supervision. During his career, he taught about 30 different courses on various topics related to his expertise, with various didactic approaches and forms, and at all levels (undergraduate, graduate, post-graduate, post-doctoral). Overall, his teaching is well evaluated (scores of 3.9-4.4 on a scale of 0-5 in courses recently taught). FNP's research program, led by Arts between 2006 and 2018, was evaluated by an international peer review committee in June 2015 and its quality and relevance were both assessed as 'excellent'.
